

Casalecchio di Reno, 12<sup>th</sup> March 2020

**Subject: Update 12.03 COVID-19 situation**

To the kind attention of the Fanti Group partners, customers and suppliers,

We hereby update you on some of the effects related to the new strengthening rules of the health prevention system, which were launched starting from 10<sup>th</sup> March.

With regards to the opening of borders, we inform you that health check points have been strengthened on the borders between some of the European countries and the situation is evolving constantly. **Flow of goods might be thus affected with transportation delays or cancellations.**

Secondly, the Italian government has launched new measures which aim, among other things, at limiting commercial activities on the national territory. **There are no substantial effects on industrial production activities.**

We therefore confirm that to date all our production sites will continue their production and shipment of goods on a regular basis. However, the international transport situation might cause delays and cancellations.

We remain committed to constantly updating you through our email and our website [www.gruppofanti.com](http://www.gruppofanti.com)

As usual, we remain available for any clarification.

Yours sincerely,

Stefano Fanti
